U.S.AVidyaNiketan,Tumsar   2020
Secondary Education (CBSE Board)
Percentage: 71.40%

Skills and Abilities

- **Web Development:** HTML, CSS, JavaScript
- **Database:** SQL, NoSQL
- **Programming Languages:** C, Java
- **Tools & Platforms:** AWS DevOps, Netlify, VS Code, GitHub, Figma
- **Soft Skills:** Leadership, Communication Skills, Problem-Solving
- **Subjective Knowledge:** Database Management Systems, Operating Systems, Object-Oriented Programming,Data Structures, Machine Learning

Projects

UPI Transaction Fraud Detection System
Technologies: HTML, CSS, JavaScript, Python
Developed a web-based UPI transaction frauddetection system to detect online UPI frauds, implemented by training different machine learning and deep learning models and tested using the Transformer model achieving the highest accuracy, which analyzes the data to predict whether a

transaction is fraudulent or legitimate, with the frontend built using HTML, CSS, and JavaScript to collect transaction details.

FoodWasteConnect – Share Surplus Food
Technologies: HTML, CSS, JavaScript, MongoDB
Developed a website where users can list surplusfood for free pickup by people in need, addressing the issue of large quantities of edible food beingwasted daily in homes, restaurants, and events while many people still go hungry.
